

ASSEMBLY INSTRUCTIONS – GARGOYLE

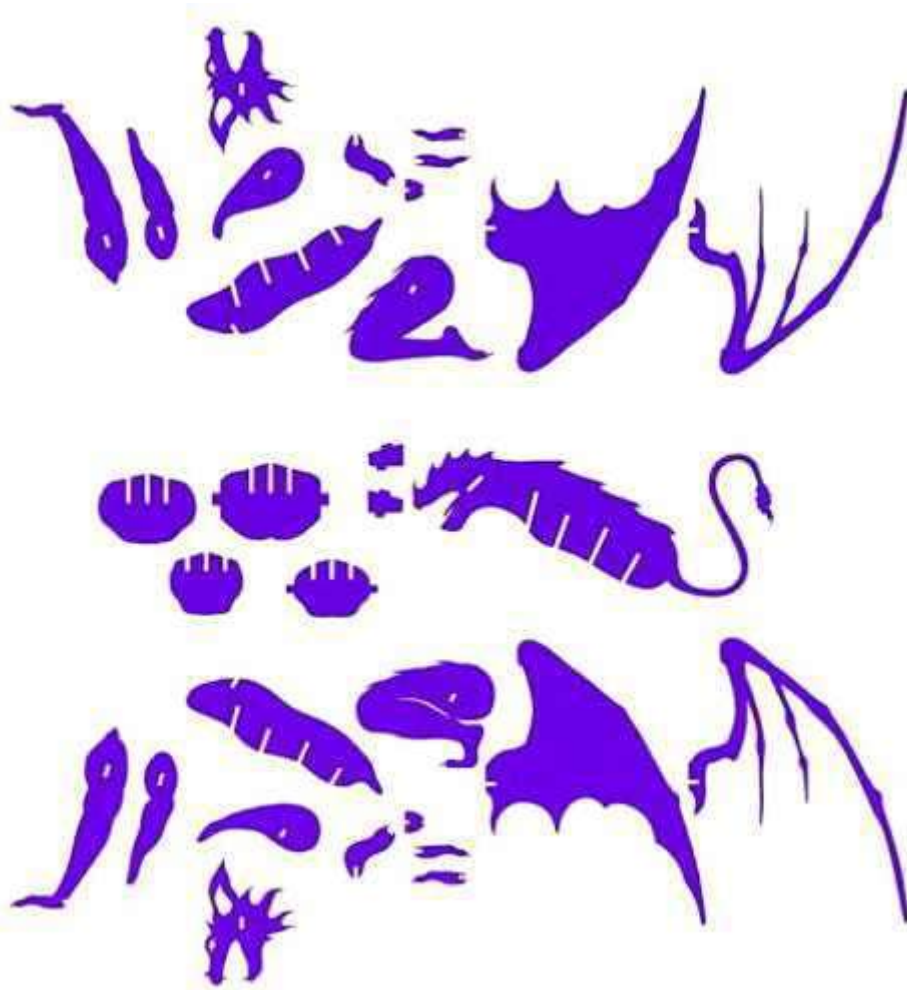

HINTS & TIPS

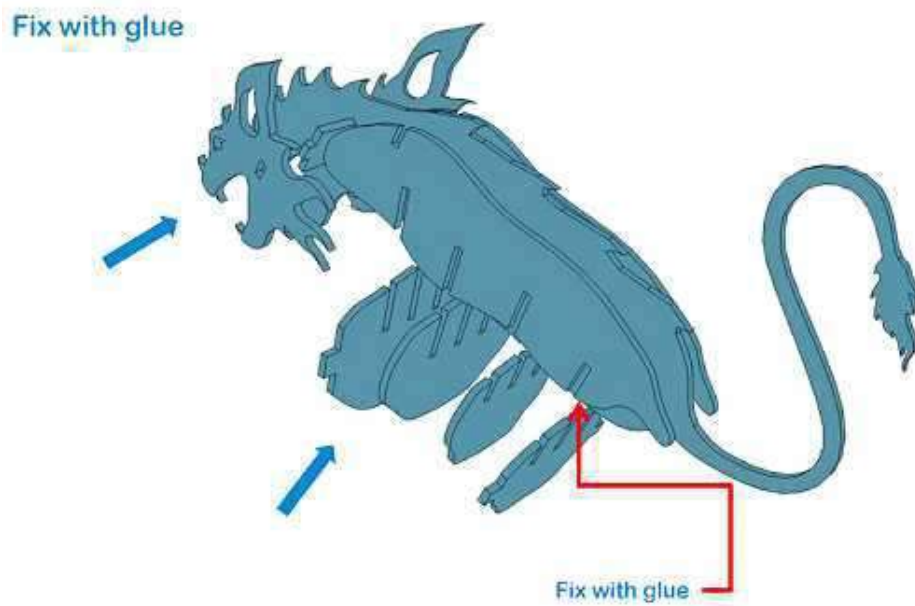

Always use a good quality wood glue. You may find low tack masking tape useful to hold things together while drying. Make sure you wipe away any glue oozes immediately with a damp cloth.

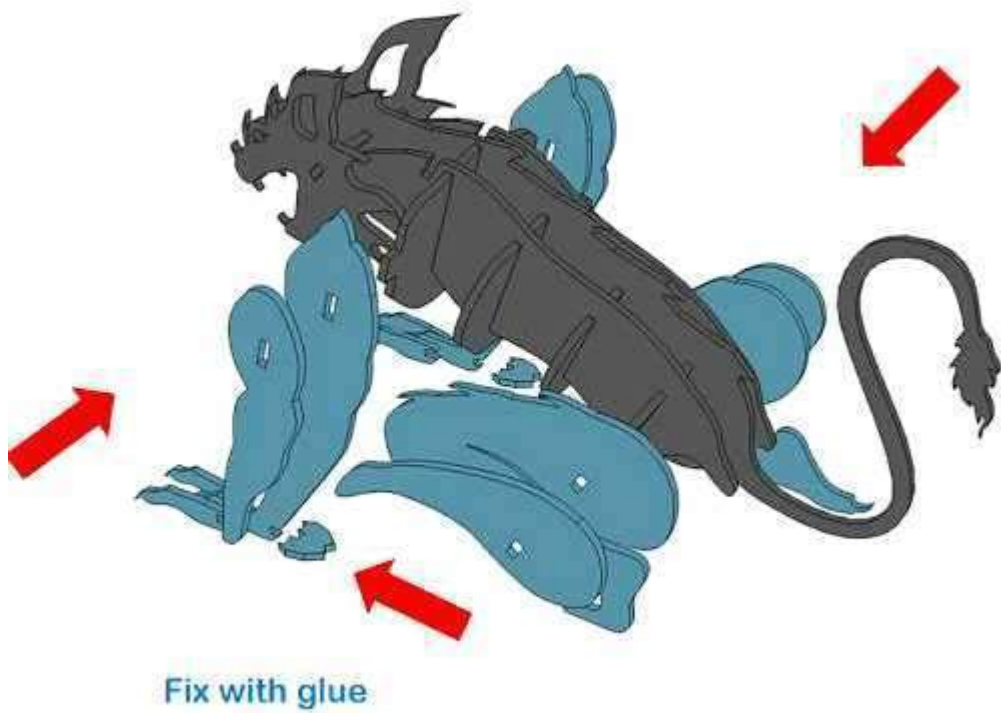

PARTS LIST

Your kit will arrive with all the parts on sheets – you can paint/roller the parts before assembly if required but ensure you don't get any in the joints/areas to be glued as this will make assembly more difficult. It can help to mask these areas off prior to painting.

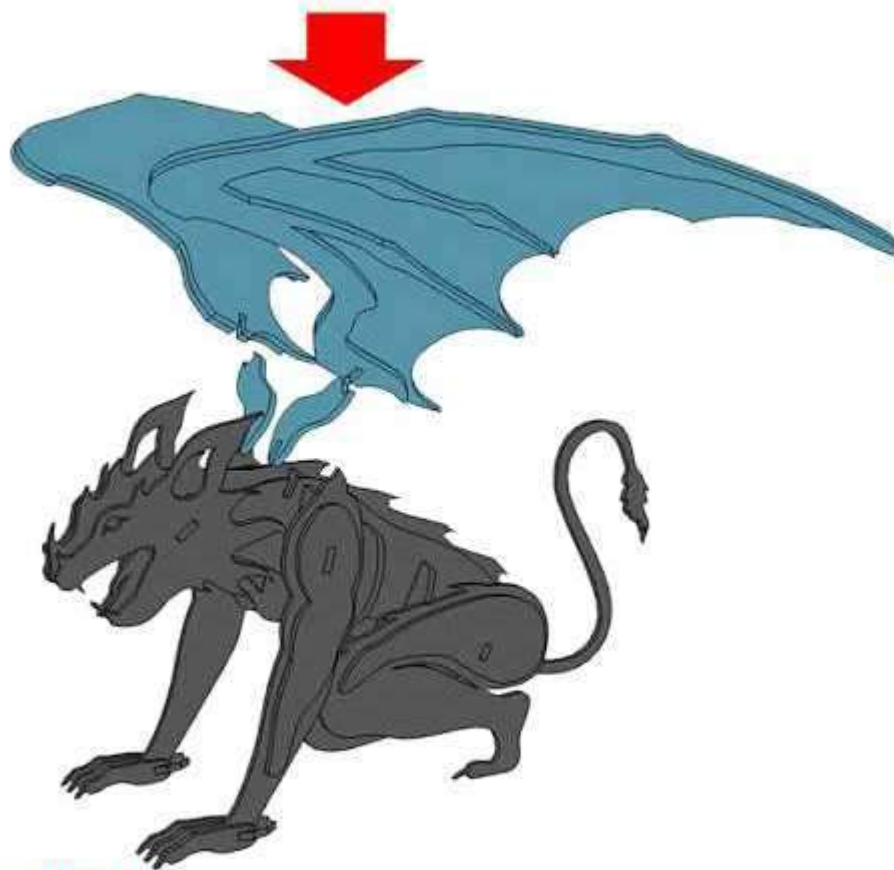

- Attach the 2 body sides to the main spine/tail piece ensuring that all the slots line up
- Insert the 2 small shoulder/neck pieces onto which you'll attach the skull
- Attach the 2 skull pieces so the nose joins at the front and flares out to the shoulder/neck joint
- Slot in the body struts where indicated in the correct order

- Layer the front and back leg pieces
- Attach foot and claw pieces to the front legs
- Attach leg pieces to the main body struts

Fix with glue

- Glue wing pieces together
- Attach wing mounts to shoulder slots on the main body
- Attach wings to shoulder mounts
