

Calico Craft Parts

Assembly Instructions – Shrines & Cubbies

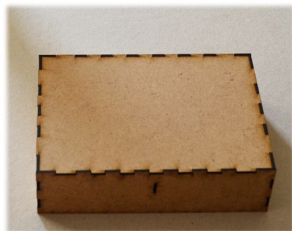

When you receive your kit it will come as a flat pack sheet – just pop the pieces out and get ready to assemble. Use a good quality glue for best results.

You can paint the parts before assembly but ensure you avoid getting paint in the finger joints or assembly will be difficult. If you are going to line the piece with paper, use the unassembled parts as a pattern.

Assemble the box frame by gluing the side and end pieces together – make sure the flat edges are all the same way up.

If you have purchased a kit with shelf, glue the shelf into the slots at this stage before attaching the last piece of frame.

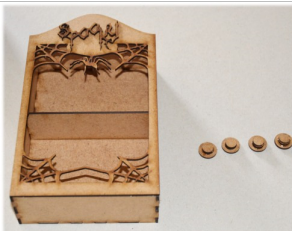

The back piece should slot in quite comfortably.

You may wish to use low tack masking tape or elastic bands to hold the piece together as it dries.

If you haven't already, you may wish to paint or decorate the inside before gluing on the front piece.

Once fully assembled and dried, you can add any additional embellishments that come with the kit or add your own to create a totally unique piece.

If you chose to use the optional feet, glue these together and once dry, attach to the bottom of the piece.

And that's it – we hope you've enjoyed putting your kit together.
