

Calico Craft Parts

Assembly Instructions – Sleigh Style 1

	<p>When you receive your kit it will come as a flat pack sheet – just pop the pieces out and get ready to assemble. Use a good quality glue for best results.</p> <p>You can paint the parts before assembly but ensure you avoid getting paint in the finger joints or assembly will be difficult.</p>
<p>STEP 1</p> 	<p>Lay one of the side pieces flat and insert the back piece. Ensure the “good” surface is always facing out – you may wish to do a dry run (no glue!) assembly first.</p> <p>Dab a light amount of glue onto the tenons and insert into the slots – wipe up any excess glue immediately with a damp cloth.</p>
<p>STEP 2</p> 	<p>Glue in the base of the sleigh.</p>
<p>STEP 3</p> 	<p>Glue in the kickboard.</p>
<p>STEP 4</p> 	<p>Attach the remaining side piece.</p> <p>And that’s it – we hope you’ve enjoyed putting your kit together.</p>
